The E5DES project presents its outcomes after 4 years of work

On November 28th, an online results presentation event took place, featuring simultaneous translation to Spanish, French, and Portuguese, serving as a platform to showcase how E5DES has addressed the current challenges and needs in the field of desalination.

The hyper-realistic 3D construction of a desalination plant will aid in education and dissemination about desalination processes

The Canary Islands Agency for Research, Innovation, and Information Society (ACIISI), within the DESAL+ LIVING LAB platform, has produced a hyper-realistic animated 3D video aimed at presenting in detail the operations of an industrial seawater reverse osmosis desalination plant.

Final touch to the training received by the 83 students participating in the 1st Edition of the Specialized Training Program in Operation and Maintenance of Desalination Plants

The purpose of this technical event was to provide students and attendees with an excellent insight into the trends in seawater desalination by an outstanding speaker.

Two new project proposals recently submitted within the framework of E5DES project

Both proposals aim to achieve significant milestones in desalination research and development by driving sustainable and effective solutions.

EVENTS

Events promoted by DESAL+ LIVING LAB

- [Fast-Track School # 1 Solar-driven water production & water treatment technologies and brine treatment processes](#)

PLACE: Online and on-site at UNIPA, Università degli Studi di Palermo, Palermo, Italia

DATE: 10/01/2024 - 11/01/2024

- [Next edition of the specialized training program in desalination.](#)

PLACE: Online and on-site sessions

DATE: Planned for February 2024

- [Online intensive course on "MEMBRANE TECHNOLOGY, PROCESS AND SYSTEM DESIGN"](#)

PLACE: Online

DATE: 11/04/2024 to 12/04/2024 and 15/04/2024 to 18/04/2024
